SECTION C DESCRIPTIONS AND SPECIFICATIONS

Financial Card Management Support

Contractor Support Services (CSS)

1.0 Introduction:

The establishment of Department of the Navy Consolidated Card Program Management Division (DON CCPMD) was necessary to centralize operational control of various Navy Financial Charge Card Programs. These programs include the Purchase Card Program, the Navy Charge Individually Billed and Centrally Billed Travel Card Program, the Fleet Card Program, the Ships' bunkers' Easy Acquisition (SEA) Card Program and the Aviation Into-plane Reimbursement (AIR) Card Program. Centralizing and consolidating these programs in one office has provided a consistent and integrated management approach, ensuring a single voice to our Navy and Marine Corps customers and business partners, delivering goods and services more efficiently, and facilitating the evolution of technological solutions.

The DON Purchase card program includes approximately 10,000 cardholders, 5,000 approving officials, and 1,000 agency program coordinators over 20 major claimants. There are approximately 1.2 million annual transactions resulting in approximately \$1.1 billion in annual charges. The Navy travel card Individually Billed Accounts (IBA) Program includes approximately 320,000 cardholders, 12,000 agency program coordinator (APC) hierarchies, an estimated 4,118 APCs over 19 major claimants. The annual charge spend is approximately \$760 million. The DON Fleet, SEA and AIR card programs are smaller in terms of transaction and charge volume than the purchase and travel programs, but support fleet requirements DON wide. The Fleet Card annual transaction volume for FY16 was approximately 180,000 resulting in an approximate expenditure of \$15.5 million. The AIR card program annual transaction volume for FY16 was approximately 88,000 resulting in an approximate expenditure of \$200 million.

As Program Manager for DON financial cards, CCPMD manages all card programs with responsibilities falling into four main categories: component program management, operations (day-to-day), guidance & training and continuous improvement. Component program management includes such items as program oversight, audits, metrics, and bank interface. Operations include items such as customer support, fraud and delinquency management. Guidance and training includes such items as development and distribution of computer based training materials, video based training materials, development, update and distribution of desk guides, and conducting customer training sessions. Continuous improvement includes items such as identification, development and implementation of innovative solutions used in commercial financial card programs that have application in DON. CCPMD coordinates extensively with DON customers and serves as the Department's advocate for improved support from private sector financial institutions.

The specific outcome of this program is to maintain Government interests for centralized card management and apply innovative techniques that support, maintain, and improve the card program Navy-wide.

fingerprint results is required as an interim measure prior to the contract employee start date. An unfavorable determination made by the Navy Command's Security Manager is final and such a determination does not relieve the contractor from meeting any contractual obligation under the contract.

The contractor shall include the IT Position Category per SECNAV M-5510.30 for each employee designated on a VAR. The potential consequences of any requirements under this clause including denial of access for a proposed contractor employee who fails to obtain a favorable trustworthiness determination in no way relieves the contractor from the requirement to execute performance under the contract within the timeframes specified in the contract. Contractors shall plan ahead in processing their employees and subcontractor employees for working in non-sensitive positions, with sensitive information, and/or on Government IT systems. The contractor shall insert this clause in all subcontracts when the subcontractor is permitted to have physical access to a federally controlled facility and/or access to a federally controlled information system/network and/or access to government information.
